

CONNECTING STUDENTS WITH FUTURES IN ADVANCED TECHNOLOGIES

December 11, 2024

For more information, please visit www.portsanantonio.us

Nearly 2,000 students from across the region recently took part in CORE4 STEM, a two-day expo organized by the San Antonio Hispanic Chamber of Commerce and hosted at the Port, that engaged them with an array of exciting activities and introduced them to leading industry professionals in areas that included robotics, drones, cybersecurity, aerospace, space science, advanced manufacturing and more.

StandardAero launched its new Training Academy and Mechanic Training Program in June of this year and has graduated 55 new mechanics to date. The Mechanic Training Program can support up to 200 new mechanics annually. The company started this program to help meet the need for additional maintenance workers at its facility in San Antonio, as well as for other company locations in the future.

CORE⁴

POWERING THE FUTURE
